Product Description

Huperzine A is a natural compound derived from the Chinese club moss plant (Huper serrata). It is a highly purified and standardized extract known for its potent neuroprotective and cognitive-enhancing properties. Huperzine A is available in the form of capsules or tablets, making it convenient for consumption.

Basic Info.

Model NO.	Huperzine A
Application Form	Injection, Lotion, Suppository, Paste, Tablet, Capsule
Application	Food, Health Care Products, Medicine
State	Powder
Extract Source	Huper Serrata
Certificate	HALAL
Shelf Life	2 Years
Color	Green Color
Sample	Avaliable
Brand Name	KOMESZ
Extraction Type	Liquid-Solid Extraction
Packaging	Drum
Place of Origin	Shanghai, China
Production Capacity	50000t Per Year

Main Function

Huperzine A acts as an acetylcholinesterase inhibitor, which means it prevents the breakdown of acetylcholine, a neurotransmitter involved in learning and memory processes. By inhibiting the enzyme that breaks down acetylcholine, Huperzine A helps to maintain higher levels of this neurotransmitter in the brain, leading to improved cognitive function, memory retention, and overall mental clarity.

Application

Huperzine A is widely used as a dietary supplement to support cognitive health and enhance memory and focus. It is often utilized by students, professionals, and individuals seeking to improve their cognitive performance or alleviate age-related cognitive decline. Additionally, Huperzine A has shown potential in the treatment of neurodegenerative conditions such as Alzheimer's disease.
