Product Description

Colorless Acicular Crystal Plant Extracts Featuring Polyphenols

Product Overview

Our premium botanical supplement is derived from Polygala Tenuifolia Willd roots, renowned for rich bioactive compounds and traditional medicinal uses. This extract delivers potent active ingredients, particularly Lovastatin, recognized for beneficial effects on cholesterol regulation and cardiovascular health.

Extracted using advanced techniques, the Lovastatin content ensures maximum efficacy while maintaining natural integrity. The bitter taste confirms purity and presence of active phytochemicals contributing to effectiveness.

Applications

Our plant extracts contain active ingredients including flavonoids, alkaloids, tannins, and polyphenols, making them ideal for skin care and food industries. These provide antioxidant, anti-inflammatory, and antimicrobial effects.

Skin Care: Used in creams, lotions, serums, and masks to combat free radicals, reduce redness, improve skin elasticity, and soothe irritated skin.

Food Industry: Serve as natural additives enhancing flavor, preserving freshness, and providing health benefits in dietary supplements and functional foods.

Customization Services

We offer comprehensive customization services to meet specific needs. Available in both water-soluble and oil-soluble forms, these extracts maintain quality and efficacy for 24 months. Custom adjustments in solubility, concentration, or packaging available.

Support & Services

Technical support available for extraction methods, application techniques, and quality assurance. Comprehensive guidance on optimal storage conditions and customized consultation services for effective integration into formulations. Troubleshooting assistance and online product registration for updates and exclusive resources.

Frequently Asked Questions

What types of plant extracts are included in this product?

This product contains a blend of natural plant extracts such as green tea, chamomile, aloe vera, and ginseng, known for their beneficial properties.

How should I use the Plant Extracts product for best results?

For best results, apply the product as directed on the packaging. Typically, it can be used topically or added to your skincare routine once or twice daily.

Is the Plant Extracts product suitable for all skin types?

Yes, our Plant Extracts product is formulated to be gentle and is suitable for all skin types, including sensitive skin.

Are there any artificial additives or chemicals in the Plant Extracts product?

No, the product is made from natural plant extracts and is free from artificial additives, parabens, and harmful chemicals.

Can I use the Plant Extracts product alongside other skincare products?

Yes, the Plant Extracts product can be safely combined with other skincare products. However, we recommend doing a patch test first to ensure compatibility.
