Enhance Immunity Plant Extracts

Premium plant extracts containing Polygala Tenuifolia Willd and Einesc 2046801, ideal for natural immune boosting supplements.

Product Overview

Plant extracts have been utilized for centuries across various cultures, valued for their remarkable benefits in both skin care and food applications. These traditional plant extracts embody the essence of nature, offering a wealth of bioactive compounds that promote health, vitality, and well-being.

Derived from carefully selected botanical sources, our botanical plant extracts are known for their purity and potency, making them highly sought after in the cosmetic and food industries. Their versatility allows incorporation into a broad range of formulations, from aqueous skin care serums to oil-based creams and diverse food products.

Key Features

- Product Name: Plant Extracts
- Taste: Bitter
- Odor: Characteristic Plant Aroma
- Specification: 10:1
- Product Appearance: Colorless Acicular Crystal
- CAS Number: 611-71-2
- Contains botanical plant extracts known for purity and potency
- Derived from traditional plant extracts ensuring natural authenticity
- Formulated to maintain natural efficacy and quality

Technical Specifications

Active Ingredients	Flavonoids, Alkaloids, Tannins, Polyphenols, Lovastatin
Odor	Characteristic Plant Aroma
General Source	Polygala Tenuifolia Willd
CAS Number	611-71-2
Shelf Life	24 months
Usage	Skin Care, Food
Specification	10:1
Storage Conditions	Cool, Dry Place Away From Direct Sunlight
Product Appearance	Colorless Acicular Crystal

This product is a high-quality traditional plant extract, manufactured following established principles to ensure purity and effectiveness. Ideal for use in skin care and food applications.

Applications

Botanical plant extracts have become increasingly popular across various industries due to their natural origin and beneficial properties. These traditional plant extracts are widely used in pharmaceuticals, nutraceuticals, cosmetics, and food products.

The solubility of these botanical plant extracts can vary, being either water-soluble or oil-soluble depending on the specific extract. This versatility allows application across a range of formulations:

- Water-soluble extracts: Ideal for beverages, dietary supplements, and aqueous cosmetic products
- Oil-soluble extracts: Preferred in lipid-based formulations such as creams, ointments, and essential oils

These extracts are commonly used in health and wellness products aimed at supporting cardiovascular health, functional foods, dietary supplements, herbal medicines, and cosmetic applications including anti-aging and skin-nourishing products.

Customization Services

Our botanical plant extracts offer customized solutions to meet your specific needs. The plant extracts derived from Polygala Tenuifolia Willd are available with a standardized specification of 10:1, ensuring high quality and consistency.

We provide flexible customization services including:

- Concentration adjustments
- Packaging options
- Precise formulation to suit product requirements
- Bulk quantities or specific extraction ratios

To maintain efficacy and stability, we recommend storing extracts in a cool, dry place away from direct sunlight.

Support & Services

Our plant extracts product is backed by comprehensive technical support and services to ensure optimal use and satisfaction. We provide detailed product documentation including usage guidelines, safety data sheets, and formulation tips.

Our technical support team is available to assist with inquiries regarding product specifications, application methods, and troubleshooting. We offer customized consultation services to help tailor our plant extracts to meet your specific needs.

All our plant extracts undergo rigorous testing to meet industry standards, ensuring consistency and efficacy. We are committed to continuous improvement and innovation to support your product development and manufacturing processes.

Frequently Asked Questions

What are the main benefits of using Plant Extracts?

Plant Extracts are rich in natural compounds that support overall health, improve skin vitality, and provide antioxidant protection.

How should I use the Plant Extracts product?

Usage instructions vary depending on the specific extract, but generally it can be taken as a supplement, added to skincare routines, or used in aromatherapy. Please follow label directions for best results.

Are Plant Extracts safe for all skin types?

Yes, most Plant Extracts are suitable for all skin types, but it's recommended to do a patch test before full application to ensure there is no allergic reaction.

Can Plant Extracts be combined with other supplements or medications?

While Plant Extracts are natural, it's advisable to consult with a healthcare professional before combining them with other supplements or medications to avoid potential interactions.

How is the Plant Extracts product sourced and processed?

Our Plant Extracts are sourced from high-quality, organic plants and processed using gentle extraction methods to preserve natural potency and effectiveness.
