Shelf Life	24 months

Applications

Our 10:1 specification botanical plant extracts are widely valued for their potency and purity across various industries. The 10:1 ratio indicates the extract is concentrated ten times compared to the original plant material. Primary applications include dietary supplements and herbal medicines, cosmetics and personal care products, food and beverage flavorings, and research and development. Free 10-20g samples are available for evaluation.

Customization Services

We offer customizable solutions tailored to meet your specific needs. Our traditional plant extracts with CAS Number 611-71-2 can be customized for various applications while maintaining optimal storage conditions to ensure efficacy and purity.

Support & Services

Our dedicated technical support team provides comprehensive assistance including product usage guidance, troubleshooting, specifications information, and application support. We offer product customization, quality assurance testing, and regulatory compliance support.

Frequently Asked Questions

What are the main benefits of using Plant Extracts?

Plant Extracts are rich in natural antioxidants and nutrients that help improve skin health, boost immunity, and provide anti-inflammatory properties.

How should I use Plant Extracts for best results?

For topical use, apply a few drops directly to the skin or mix with your favorite moisturizer. For internal use, follow the recommended dosage on the packaging or consult a healthcare professional.

Are Plant Extracts suitable for all skin types?

Yes, Plant Extracts are generally safe and beneficial for all skin types, including sensitive skin, but it is advisable to do a patch test before full application.

Can Plant Extracts be combined with other skincare products?

Yes, Plant Extracts can be safely combined with most skincare products. However, avoid mixing with products containing harsh chemicals to prevent irritation.

Is this product organic and free from harmful chemicals?

Yes, our Plant Extracts are sourced from organic plants and are free from parabens, sulfates, and synthetic fragrances.
