Product Description

Mango Beverage Flavour

Komesz Mango Beverage Flavour is a premium water-soluble liquid flavouring that reproduces the sweet, juicy and aromatic character of ripe tropical mangoes. Its balanced profile combines luscious ripe-fruit sweetness with a soft, slightly creamy tropical note, delivering the authentic taste consumers associate with fresh mango nectar and juice. The liquid formulation disperses instantly and remains crystal clear in solution, making it ideal for still and carbonated beverages. Whether you are producing a classic mango juice, a tropical fruit blend or a sparkling mango drink, this flavour provides consistent, batch-to-batch results at economical dosage rates.

Key Features

- **Authentic Sweet Mango Profile:** A luscious blend of ripe tropical mango sweetness with a soft, slightly creamy finish that closely matches fresh mango nectar and juice.
- **Water-Soluble Liquid Form:** Readily miscible in water, carbonated bases and syrups, dispersing instantly without clouding, sedimentation or separation for a crystal-clear finished beverage.
- **High Concentration, Low Dosage:** A concentrated formulation that delivers full-bodied flavour at a typical dosage of only 0.05% to 0.20%, reducing your per-unit flavouring cost.
- **Excellent Stability:** Heat-stable and shelf-stable under normal storage, retaining its aroma and taste profile throughout the product shelf life of your finished beverage.
- **Food-Grade & Certified:** Manufactured to strict food-grade standards under ISO22000, with HACCP, KOSHER and HALAL certification available to support global market compliance.
- **Customizable (OEM/ODM):** Flavour strength, sweetness balance and aroma notes can be tailored to your specific recipe and regional taste preferences.

Technical Specifications

Parameter	Specification
Product Form	Liquid form
Appearance	Colorless to Light Yellow Clear Liquid
Solubility	Water soluble
Recommended Dosage	0.05% - 0.20%
Transmittance	Min. 95.0%
